A free week of 3rd grade daily math review, with an answer key

Peabody blog · Teaching · updated 2026-10-30

Free 3rd grade daily math review: five items a day, three on the week's times table and two spiral review facts, with an answer key. Any of 36 weeks, no sign-up.

Peabody Teach's morning work maker prints a free week of 3rd grade daily math review: five items a day, Monday to Friday, three on the week's times table and two spiral review facts from earlier skills, with an answer key. Pick grade 3 and a school week from 1 to 36, and print. No sign-up, nothing sent, and Peabody is free through the end of 2026.

What Monday of week 1 looks like

Here are the five math items the maker prints for 3rd grade on Monday of week 1, when the week's skill is the 2 times table:

1. 18 ? 9 = ? (A 11, B 8, C 9)
2. 9 × 2 = ? (A 18, B 9, C 20)
3. 2 × 12 = ? (A 36, B 12, C 24)
4. 14 ? 6 = ? (A 9, B 6, C 8)
5. 7 × 2 = ? (A 14, B 9, C 7)

Three items are on the 2s. Two are subtraction facts from 2nd grade, mixed in rather than tacked on at the end. The wrong boxes are near misses, the kinds of slips children actually make, so a guess doesn't get far. On the key, the two subtraction items are marked "(review)".

Under the math, the same day has a sentence to fix (Jamals bike has a flat tire so he walked to school needs an apostrophe, a comma and a period) and a word of the day: nibble, which means to eat with tiny bites.

How the year moves

For 3rd grade, the week's skill moves through the times tables from the 2s to the 12s across the 36 weeks, about three weeks on each table. The two review items each day come from earlier skills: adding and taking away facts, and the times tables already done. Nothing taught is dropped.

That mix is spiral review. A page of twenty 7s right after a lesson is blocked practice, and it has its place. Daily review adds what a block can't: a reason to remember last month's skill. Our guide Spiral review: what it is and how daily math review works explains the difference, and the spiral or blocked quiz is a two-minute check.

Printing it

1. Open the morning work maker and choose Grade 3.
2. Pick the week, or tap this week, which counts from the first Monday in August.
3. Choose one day a page or two (half sheets) and keep Answer key ticked.
4. Print the week. Five days, then the key.

Want a different set for the same week? New version deals one. Today on the board puts one day large on the projector so the class can check it together. The settings ride after the # in the address, so the link opens the same week on any computer and nothing reaches a server.

Five minutes to check it

The review only helps if students find out what they missed. A quick routine:

- Put the day on the board.
- Ask for each answer and how the student got it.
- Students mark their own page with a different color.
- Note which items had few right answers. If a review item trips up half the class, that skill gets a quick reteach this week.

You don't need to grade it. It is practice.

Beyond facts

The maker's 3rd grade math is fact review. For word problems, place value or fractions, paste your own questions as "question: answer" lines into the quiz maker or the task card maker, and both print three-box questions with wrong answers made from your other answers. A fact fluency check by grade is covered in math fact quizzes by grade.

For reading time

Early finishers can read one of Peabody's free stories, leveled from the earliest readers to 8th grade.

Questions

Is there a free daily math review for 3rd grade?

Yes. The morning work maker prints a week of 3rd grade daily math review, five items a day with an answer key, for any of 36 school weeks, with no sign-up, free through the end of 2026.

What does 3rd grade spiral review cover?

In the maker, the week's skill moves through the 2s to the 12s times tables, and each day mixes in two review facts from adding, taking away and the tables already done.

Can I print it as a PDF?

Use your browser's print dialog and choose to save as PDF. The week prints one day a page, or two days a page as half sheets, with the answer key at the end.

How long should daily math review take?

Five items take most 3rd graders a few minutes, and checking them together on the board takes about five more.
